Power BI Training Week

PROJECTS

WEB PORTFOLIO DESIGN

Designed a website version portfolio showcasing my ability in the web design skill and embedded sales dashboard project, car models analysis and infographic designs.

Used JavaScript to capture inputs from a form on my contact us page and store on a spreadsheet in my Google drive.

I hosted the website on GitHub pages which offer free static website hosting ground.

<https://dzulee.github.io/denisambetsawebportfolio/>

POWER BI SALESDASHBOARD

During my training in power bi week camp by Leornado Karpinski I was able to create a sales dashboard and report with key metrics.

I created measures of orders, revenue and average ticket price (ATP) from sales table and budget amount from. Budget table using DAX language.

Performed comparison of sales person revenue to the budget amount using a horizontal bar chart and used a conditional formatting to show if revenue surpassed the budget amount.

Performed a ranking analysis using RankX and TOPN DAX function to show best and leading sales person by revenue.

EXPERIENCE

RAIN WATER HARVESTING KENYA

| PO BOX 220 MOLO
